INSPECTION PROCEDURES. The team may enter the drill area however they choose. However, once halted, they must be in three elements/squads. Once on the drill pad, the commander will halt their flight and face them centered. At this point, the commander will command “Open Ranks, March” and “Ready Front” and then execute an about face. The commander will then salute and report in to the head judge. Once the head judge has finished inspecting the commander, he/she will about face to see when all judges have completed inspecting the 3 elements. Upon seeing all inspection has been completed, the commander will give the command of “Close Ranks.” The commander then preforms an about face, salutes, and reports out. The team will then exit the drill area in the quickest manner possible and prepare to begin the regulation phase of competition.

SECTION 12—WARRIOR CHALLENGE

Detachment 847 insists that cadets participating in the Warrior Challenge be in top shape and prepared for a physical challenge.

PHYSICAL FITNESS TEST. This test will consist of maxing out push-ups and sit-ups within 1 minute and a timed mile and a half run. Members will receive age and gender-specific composite scores based on the following maximum component scores: 60 points for aerobic, 10 points for push-up and 10 points for sit-ups for a max of 80 points. Scoring will come directly from AFPC Fitness Scoring Charts. Physical Training gear will be worn for this event. The group's score will be calculated by adding each member's score together.

TEAM COMPOSITION. Each team will consist of 4 members with at least one female.

EQUIPMENT. Cadets participating in the warrior challenge must wear their unit's issued physical training gear and running shoes. Cadets failing to bring proper attire will not be permitted to participate in the challenge.

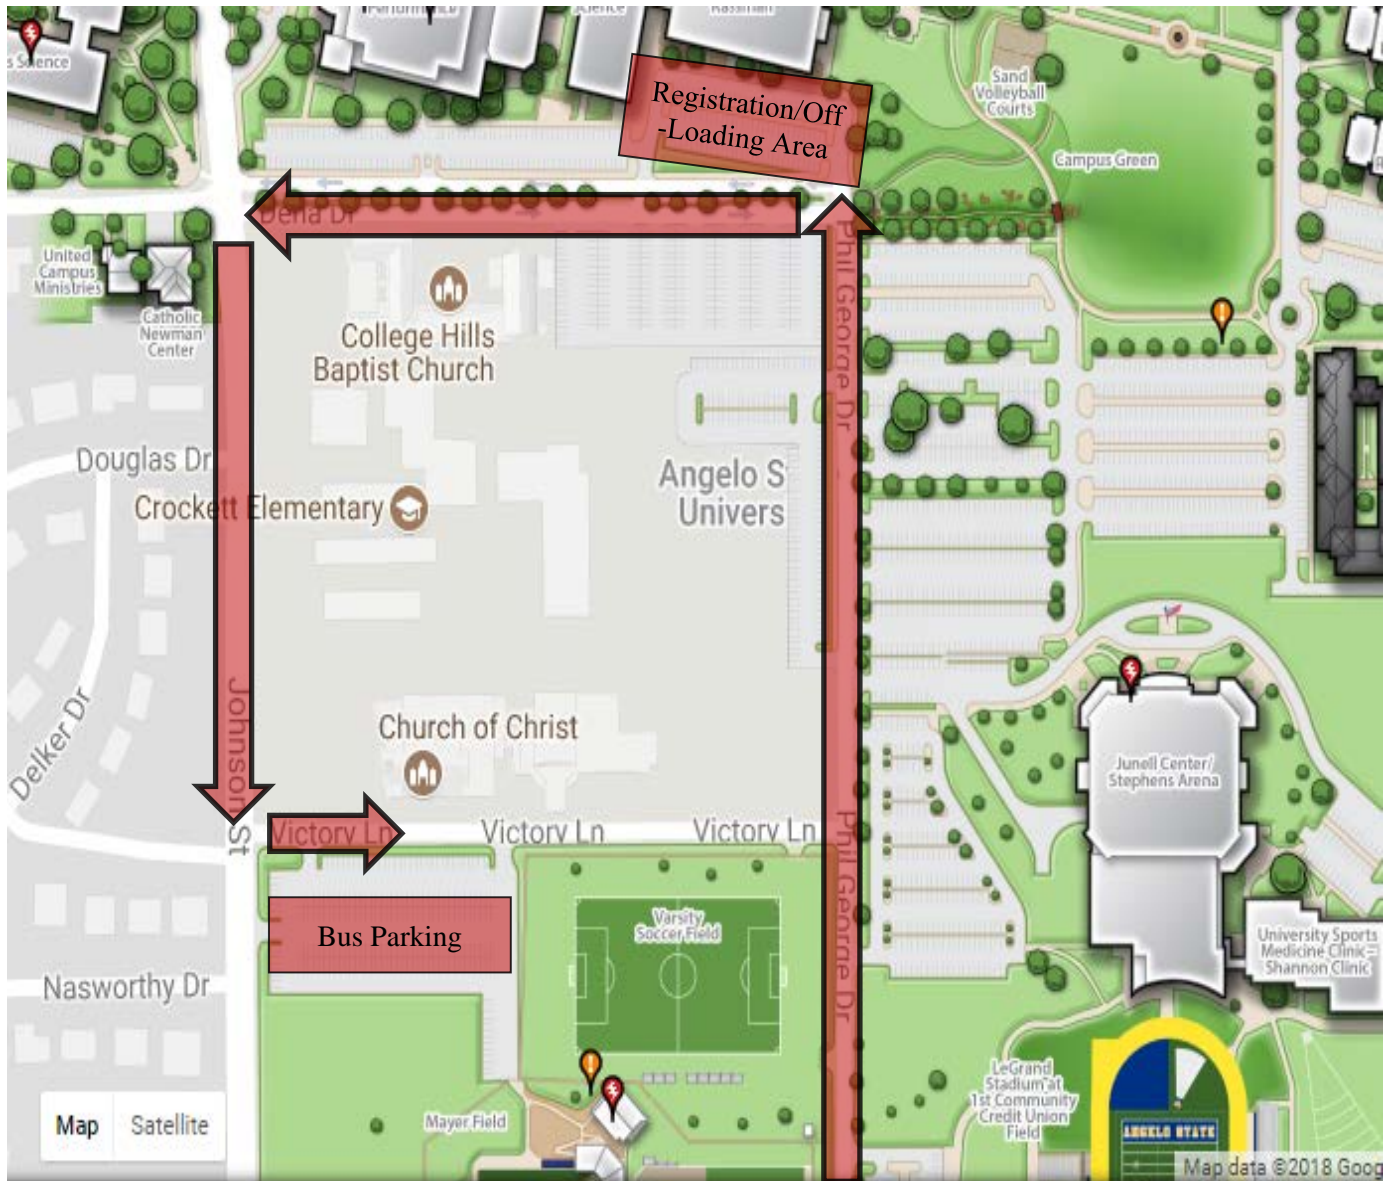

WARRIOR CHALLENGE PROCEDURES.

- a. **Push-Ups:** The member will begin in the starting position, with arms fully extended and the body in a straight line from head to heel. The feet may be no more than 12 inches apart. The body should maintain a rigid form from head to heel (the body may not bow unless resting in the up position). The member may rest in the up position only. The member will lower the body to the ground until the elbow is bent at least 90 degrees before pushing back up to the starting position. If the member does not come down far enough, the push-up does not count. The member completes one full push-up after returning to the starting position.
- b. **Sit-Ups:** The member will lie face-up on the ground. The member's knees will be bent at a 90° angle, with the feet/heels in contact with the floor. The heels and buttocks must remain on the floor during the entire assessment. The member's arms will be crossed over the chest with the hands resting on the upper chest. The member may request to have their feet held down with the hands or by putting knees on feet but the monitor may not anchor the member's legs by holding onto the calves. A complete crunch is accomplished when the upper torso of the member is raised off the floor, the elbows touch the knees or thighs, and the upper torso is lowered back to the floor until the shoulder blades touch the floor.
- c. **Run:** The run will be 1.5 miles. You will line up behind the starting line and will be instructed to begin running. No physical assistance from anyone or anything is permitted. Pacing is permitted if there is no physical contact and is not a hindrance to other runners. You are required to stay on and complete the entire marked course. Leaving the course is disqualifying and terminates the test. Your completion time will be recorded when you cross the finish line. If at any time you are feeling in poor health, you are to stop running immediately and you will be given assistance.
